How AI works in Learning Notes

AI helps you make notes. You always see first.

1. **You ask.** You say what you want.
2. **AI makes a plan.** A list of steps.
3. **The app checks it.** Is the plan safe?
4. **You see the cost.** Untick any step you do not want.
5. **A draft is made.** Nothing is saved yet.
6. **You look at a preview.**
7. **You tap Apply.** Undo any time.

The path, in one picture

Two ways to use it

In the app

Use AI inside your notes.

With Claude

Use Claude at claude.ai.

Same rules. Same Undo.

Why you can trust it

AI never changes your notes.

One set of rules. Used everywhere.

All or nothing. No half saves.

Safe to try again. No copies.

Nothing is deleted. Trash keeps it.

Tested on iPad first.

Cost

₹0

With Claude, it is free.

Paid AI stays off until you set a limit.

Examples

 A video becomes notes and 10 cards.

 A book chapter becomes a summary and 5 ideas.

 A messy note becomes a neat page.

 From claude.ai: add 5 cards. You tap Accept.

A step fails? Tap Retry or Skip.

Nothing is saved until you tap Apply.
